WORK EXPERIENCE

2021 — Present

- Front-End work, improving the overall look of the web application using HTML, CSS & JS.
- Assists with the Back-End, using languages such as PHP and a MySQL database.
- Learning JavaScript on the job in order to implement JS functionality.

DATABASE ANALYST

Crosslinx Transit Solutions

Assists the director of the company in the production and building of a web application that will assist the Crosslinx team. It will allow the team to find certain documentation they need quickly and effectively.

2021 — Present

- Negotiates with client about how they want their website to look and feel.
- Writes clean, readable and reusable code.
- Manages content, SEO and hosting for clients.

FRONT-END FREELANCE DEVELOPER

AJV Technologies

Develop unique experiences for businesses in the Toronto area. Websites are aimed at converting visitors.

LATEST PROJECTS

Crypto City HTML / CSS / Sass / JavaScript / jQuery

A Crypto Currency exchange/business consulting website. This was made to expand on my knowledge of CSS Flexbox.

[Visit Project:](https://andrewjacobvlietstra.github.io/crypto-city-project/) <https://andrewjacobvlietstra.github.io/crypto-city-project/>

Condor Renovations HTML / CSS / JavaScript

A Home Renovation website. This website made to increase my understanding of CSS Grid.

[Visit Project:](https://andrewjacobvlietstra.github.io/home-renovation-project/) <https://andrewjacobvlietstra.github.io/home-renovation-project/>

Envision Fitness HTML / CSS / JavaScript

A Gym website focusing on Fitness and Health. This was my first professionally made website.

[Visit Project:](https://andrewjacobvlietstra.github.io/gym-project/) <https://andrewjacobvlietstra.github.io/gym-project/>
