PORTFOLIO

ajvtechnologies.ca

SKILLS

- React / Redux
- HTML / CSS / JavaScript
- TypeScript / Node.js
- Styled Components / Sass
- RESTful API's / Firebase
- Version Control / SEO

WORK EXPERIENCE

2022 — Present

- Creates new pages from Figma mockups, fixes styling issues, business logic issues and copy issues on BMO pages.
- Reviews and approves other Dev's code, collaborates with Devs to meet deadlines.
- Updates page's appearance, updates text on page, updates links, uploads files to BMO's Content Management System.

FRONT-END DEVELOPER

BMO (Bank of Montreal)

Contracted by The Select Group to work with BMO Bank Team. Assists the Bank Team to help fix issues with pages, create new pages or make changes to existing pages across the BMO site.

2021 — 2022

- Front-End work, improving the overall look and feel of the web application using HTML & CSS.
- Implements programming logic using JS, uses callback functions to handle events, manipulates the DOM, renders data to the screen.
- Fixes various issues and bugs that arise during development, typically these are JS issues.

FRONT-END DEVELOPER

Crosslinx Transit Solutions

Assisted the director of the company in the production and building of a web application that will assist the Crosslinx team. It will allow the team to find certain documentation they need quickly and effectively.

LATEST PROJECTS

Disney+ Clone   React / Redux / Sass / TMDB API

Disney+ Clone Movie App made with React, Redux Toolkit, styled responsively with Sass and is powered by the TMDB API. Will always be up to date with popular movies and shows.
