SKILLS

- React / Redux
- HTML / CSS / JS / Sass
- Firebase
- Node.js
- Version Control
- SEO

WORK EXPERIENCE

2021 — Present

- Front-End work, improving the overall look and feel of the web application using HTML & CSS.
- Implements programming logic using JS, uses callback functions to handle events, manipulates the DOM, renders data to the screen.
- Fixes various issues and bugs that arise during development, typically these are JS issues.

FRONT-END DEVELOPER

Crosslinx Transit Solutions

Assists the director of the company in the production and building of a web application that will assist the Crosslinx team. It will allow the team to find certain documentation they need quickly and effectively.

2020 — 2021

- Processed PICOs, SATs & SITs, submitted them to Doc Control team.
- Coordinated with managers and specialists on various tasks.
- Updated commissioning procedure Excel trackers.

COMMISSIONING ASSISTANT

Crosslinx Transit Solutions

Worked with managers and specialists to process and submit commissioning documentation to our Doc Control team. These documents were used to commission and install devices on site at various stations.

LATEST PROJECTS

Disney+ Clone   **React / Redux / Sass / TMDB API**

Disney+ Clone Movie App made with React, Redux Toolkit, styled responsively with Sass and is powered by the TMDB API. Will always be up to date with popular movies and shows.
